## SUMMARY

I am a resourceful & creative full stack software engineer applying technical skill to build robust solutions. I feel at home chewing over the next great strategic move or getting to know stakeholders, and what they need from a system. I am happiest sharing successes, challenges, and new knowledge with a diverse team.

## SKILLS

JavaScript/ES6, HTML5, CSS3, CSS Grid, CSS Flex-Box, Responsive Web Design, APIs, AJAX, MVC/MVT Architecture, JQuery, Materialize, Bootstrap, Tachyons.io, Git/Github, Web Deployment via Github Pages/Heroku/Netlify, MongoDB/Mongoose, Node.JS, Express.JS, EJS, Passport.JS, React.JS, GatsbyJS, Python, Django, DTL, PostgreSQL

## PROJECTS

**Thread Programming Volunteer, Baltimore, MD, since Dec 2018**, | Thread knits new social fabric by bringing together community members and students in "Thread families".

- Helped brainstorm ideas to keep students happy and engaged during the fall CAMP program

**Baltimore Service Jam, Baltimore, MD, Mar 2018** | Global Service Jam brings together teams to design and prototype a service over one weekend.

- Participated in a team design jam to make an application to help connect users to experts or their wider support networks when they face tough decisions

**Design Thinking: DC, Summer of Design, DC, May 2017 - Aug 2017** | Summer of Design is a premiere summer course for those interested in learning or practicing Design Thinking

- Collaborated with a cross-functional team to create a solution called LiveLeaf to store data on high-end fixtures and encourage circular economies

## RELEVANT EXPERIENCE

**General Assembly Software Engineering Immersive Program, DC Area, Jun 2020 to Sep 2020** | 480 hour comprehensive, immersive, full-stack software engineering program

### Projects

- Built a static web application using AJAX, jQuery, HTML5/CSS3, and the Materialize library to fetch and render data from the Rijksmuseum in Amsterdam, NL
- Engineered a full-stack MEN web application using EJS for dynamic rendering allowing users to store and link data on their favorite music with auth0 via the Passport.JS Spotify strategy
- Collaborated to create a full stack MERN app that allows users to track daily tasks and form positive habits, implemented auth0 using JWTs, included custom logic to track goal status
- Worked with team to build a full stack web art gallery and studio, users can make digital artwork via codepen or a custom paint app, technologies include Python, Django/DTL HTML5/CSS3, AWS S3, and PostgreSQL

## ADDITIONAL EXPERIENCE

**Independent Contractor, DC/Baltimore Metro Area, Since Feb 2014**

- Organized 15+ domestic and international trips each year, and provided comprehensive remote support
- Worked with a group of 10 students to design 10 unique products & services using Design Thinking
- Facilitated a program design project at Baltimore City College to help students and teachers better connect around the International Baccalaureate Extended Essay

**Assistant Store Manager, Hollister Co, Little Rock, AR & DMV, Nov 2006 - Aug 2008 & Sep 2011 - Apr 2013**

- Managed retail operations at a location with 500K annual shoppers
- Used Crystal Reports to monitor KPIs related to sales and staffing for my store
- Utilized Oracle PeopleSoft to hire, onboard, and manage payrolls for staff of 100+ headcount

**Finance Intern, Acxiom Corporation, Little Rock, AR, Jan 2011 - Jul 2011**

- Analyzed sales & pricing data on company-wide offerings for 35+ product & solution categories
- Used SQL queries to get and populate segment-level sales and resource data for 11 team leaders

**Fiscal Accountant, Arkansas Teacher Retirement System, Little Rock, AR, Aug 2008 - Feb 2009**

- Accounted for agency Accounts Payable, Travel expenses, and Asset Expenditures of approx \$3M

## **EDUCATION**

**Software Engineering Immersive**, Letter of Completion, General Assembly, Sept 2020

**Master of Business Administration**, University of Arkansas at Little Rock, Aug 2011

**Bachelor of Science in Accounting**, Arkansas State University, May 2005
